

## RECRUITING RECENT GRADUATES OF CTE PROGRAMS & WORKERS IN CTE FIELDS WITH MENTAL HEALTH CONDITIONS

### THE STUDY:

Looking for recent graduates of CTE programs (trade school/vo-tech), workers in CTE fields with a mental health condition, as well as family members supporting CTE students, CTE educators & instructors, supervisors, hiring managers, employers, career services, supported employment/supported education specialists, and voc-rehab counselors.

- 6-10 Hours Total Time Commitment Over 3 Months
- Remote/Flexible
- No Synchronous Meetings, All independent Work
- For Early 2021
- Benefits
- \$200 Total Honorarium for Participation

Career and Technical Education (CTE or trade school/vo-tech) refers to vocationally-oriented certification or degree programs taught around a set of specific, technical or industrial standards of an occupation.

The benefits of participating in this study will result in developing a comprehensive career services toolkit for career service providers and individuals with mental health conditions to help them successfully complete CTE and become competitively employed in CTE fields. We are recruiting experts to join this research study to assist with identifying the critical knowledge, skills, and resources (KSR) to develop the CTE Toolkit.
