Subject: Today! Ongoing Employment Support and Education Meeting: Forensic Peer Specialist Overview with Todd

Ongoing Employment Support and Education Meeting

ONGOING EMPLOYMENT SUPPORT AND EDUCATION MEETING

Wednesday, April 28, 2021

from 4:30-6:00 pm.

Hosted by Jamie Bakr, Outreach and Training Peer Specialist

"Forensic Peer Specialist Overview"

Offered by

Todd French, Statewide Trainer, Mental Health Empowerment Project (MHEP)

The Mental Health Empowerment Project's Forensic Peer Specialist training is a virtual workshop based on a SAMHSA best practice model for providing support to peers in the criminal justice system. The training uses a conceptual framework called the Sequential Intercept Model to illustrate 5 specific "intercepts" that correspond with key status levels a person will pass through in the criminal justice process. The presentation will provide an overview of how to apply this model to support peers involved in the justice system. Further, it will describe how this model can help to battle a systemic problem: the criminalization of people with psychiatric labels.

Todd French

Todd French has been a Statewide Trainer for the Mental Health Empowerment Project for 6 years. Over this time he has developed many innovative new training workshops and trained both in person and Virtually. His passion is delivering training that is learner-centered and that engages participants to think and feel more deeply about the topic.

Looking forward to sharing space and thought. Hope to see you there. :)
